SLDN Series

LED Illuminated Display Lights

IDEC CORPORATION

SLDN Series Display Lights

Super Bright LED Illumination Increased Visibility for Higher Safety

- The LED units can be removed, so the color arrangements can be easily changed.
- The finger-safe spring-up terminals save wiring time.
- Six illumination colors; amber, green, red, blue, white, and yellow.
- Full, 2-way or 3-way split illumination, and two-color (red/green) alternate illumination are available.
- Legends can be engraved on the supplied marking plate. One or two thin marking sheets (not supplied) can also be installed.
- UL and c-UL listed File No. E68961
- EN compliant EN60947-5-1
- DEMKO Certificate No. 99-03194

(Except for DC-DC converter type)

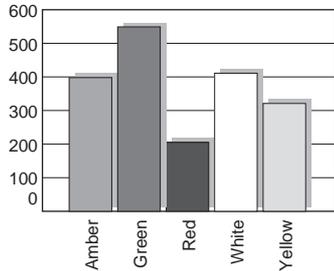

Enhanced Safety

The brightness of the super LED units results in vibrant colors and prevents recognition errors.

(IEC 60073 and IEC 60204-1)

Brightness (Previous SLD = 100)

Special circuitry is used to prevent unintended lighting due to leakage current or induced voltage. (See page 26 for details.)

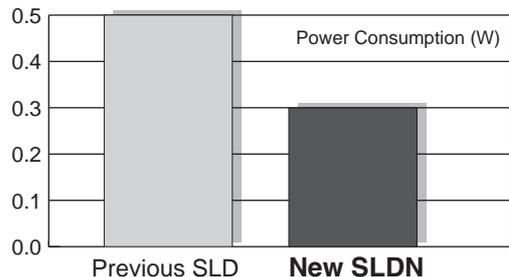

Reduced Wiring Time

The captive spring-up terminals cut wiring time in half compared with conventional units. The integrated terminal cover prevents electrical shocks. For 2-color alternate and check terminal type units, separate terminal covers are available.

Reduced Power Consumption

Super LED units ensure high brightness and reduce power consumption by 40%.

Easy Replacement of LED Units

Two or three LED units are installed in the split-illumination types. Since the LED units are removable, the color arrangement can be changed easily.

SLDN List

Type	Appearance	Frame Size (Lens Size)	Input Voltage	Illumination Face	Operating Voltage	Illumination Color

Specifications

Input Type	Full Voltage	Transformer	DC-DC Converter
Rated Voltage (Primary Voltage)	24V AC/DC, 24V DC *1 6V AC/DC, 12V AC/DC	100/110, 115/120, 200/220, 230/240V AC	110V DC
Light Source	1-color LED unit 2-color LED unit *2	1-color LED unit	
Face Division	Full *3, 2-way split, 3-way split	Full, 2-way split, 3-way split	Full
Illumination Color	Amber, Green, Red, Blue, White, Yellow Red/Green *2	Amber, Green, Red, Blue, White, Yellow	
Marking Plate	Clear (31 × 71 × 1 mm)		
Color Screen	White (Full: 31 × 71 × 1 mm, 2-way split: 31 × 35.5 × 1 mm, 3-way split: 31 × 23.5 × 1 mm)		
Engraving Area	Full: 29 × 69 mm, 2-way split: 29 × 33.5 mm, 3-way split: 29 × 21.5 mm		
Insulation Resistance	Between live and dead parts: 100 MΩ minimum (500V DC megger)		
Dielectric Strength	Between live and dead parts: 2000V, 1 minute		2500V, 1 minute
Vibration Resistance	5 to 55 Hz, amplitude 0.5 mm		
Shock Resistance	1000 m/s ² (100G)		
Operating Temperature	-20 to +40°C (no freezing)		-10 to +40°C (no freezing)
Operating Humidity	45 to 85% RH (no condensation)		
Housing Color	Black		
Weight (approx.)	92g (1-color full, 2-way split) 100g (w/check terminal, 2-color alternate) 102g (3-way split)	186g (1-color full, 2-way split) 259g (3-way split)	121g (1-color full)

*1: 24V DC is for 1-color full w/check terminal and 2-color alternate types only.

*2: For 2-color alternate type

*3: The 2-color alternate type is full face illumination only.

Types

Input Type	Illumination Face	Operating Voltage	Type No.	Illumination Color Code	Built-in LED Units (see ratings on page 17)
Full Voltage	1-color Full	24V AC/DC ±10%	SLD48N-1DH2B*	A, G, R, S, W, Y	SLDN-92F-*T (2 units)
	2-way Split	24V AC/DC ±10%	SLD48N-2DH2BGR	GR	SLDN-92F-*T (2 units)
			SLD48N-2DH2BRG	RG	SLDN-92F-*T (2 units)
	3-way Split	24V AC/DC ±10%	SLD48N-3DH2BGAR	GAR	SLDN-72F-*T (3 units)
	2-color Alternate	24V DC ±10%	SLD48N-1DWM2B*	A, G, R, S, W, Y	SLDN-92F-*T (2 units)
Transformer	1-color Full	100/110, 115/120, 200/220, 230/240V AC ±10%	SLD48N-1TH□B*	A, G, R, S, W, Y	SLDN-92F-*T (2 units)
	2-way Split		SLD48N-2TH□BGR	GR	SLDN-92F-*T (2 units)
			SLD48N-2TH□BRG	RG	SLDN-92F-*T (2 units)
	3-way Split		SLD48N-3TH□BGAR	GAR	SLDN-72F-*T (3 units)
DC-DC Converter	1-color Full	110V DC (90 to 140V DC)	SLD48N-1CH1B*	A, G, R, S, W, Y	SLDN-92F-*T (2 units)

Note 1: Specify a color code in place of * in the Type No.: A (amber), G (green), R (red), S (blue), W (white), Y (yellow).

Note 2: Specify an operating voltage (primary voltage) code of the transformer in place of □ in the Type No.:
1 (100/110V AC), 12 (115/120V AC), 2 (200/220V AC), 24 (230/240V AC).

Note 3: The above SLD48N units contain LED units of the specified color. The LED units are installed in the SLD48N housing at the factory.

Note 4: Every SLD48N unit contains a clear marking plate and white color screen(s) of the specified split face size. When color display is required during power off, see page 18.

SLDN Series Display Lights

SLD48N	40 × 80mm (Illumination face size 32 × 72mm)

Types

• Full Voltage and Transformer Split Illumination Types (LED Units Supplied)

Input Type	Illumination Face	Operating Voltage	Type No.	Illumination Color Code	Supplied LED Units (see ratings on page 17)
Full Voltage	2-way Split	24V AC/DC ±10%	SLD48N-2DH2B**	A, G, R, S, W, Y	SLDN-92F-*T (2 units)
	3-way Split		SLD48N-3DH2B***	A, G, R, S, W, Y	SLDN-72F-*T (3 units)
Transformer	2-way Split	100/110, 115/120, 200/220,	SLD48N-2TH□B**	A, G, R, S, W, Y	SLDN-92F-*T (2 units)
	3-way Split	230/240V AC ±10%	SLD48N-3TH□B***	A, G, R, S, W, Y	SLDN-72F-*T (3 units)

Note 1: Color codes come in place of ** or *** in the Type No.: A (amber), G (green), R (red), S (blue), W (white), Y (yellow). When ordering the above split illumination types, specify standard color codes found under "Color Code" in the tables below. The LED units can be arranged in any placement found under "Combination" in the table.

Note 2: Specify an operating voltage (primary voltage) code of the transformer in place of □ in the Type No.: 1 (100/110V AC), 12 (115/120V AC), 2 (200/220V AC), 24 (230/240V AC).

Note 3: The above SLD48N units are supplied with LED units of the specified colors. The LED units are packaged in the same box with the SLD48N housing at factory; not installed in the SLD48N housing. Install the LED units in required positions.

Note 4: Every SLD48N unit contains a clear marking plate and white color screen(s) of the specified split face size. When color display is required during power off, see page 18.

Safety Precautions

- Turn off power to the SLDN units before installation, removal, wiring, maintenance, or inspection. Before removing the LED unit, make sure that power is turned off. Failure to turn off the power may cause an electrical shock, create fire hazards.
- When lighting the SLDN units continuously, observe the conditions described on page 21. If these limits are exceeded, the SLDN units may heat up and create a fire hazard or damage the SLDN units.
- Use wires of a proper size to meet the voltage and current

requirements. Tighten terminal screws to a proper torque shown below. Loose screws will cause excessive heating and create fire hazards.

Terminal Screw	Proper Tightening Torque
M3	0.6 to 1.0 N·m
M3.5	1.0 to 1.3 N·m

- Do not install and operate the SLDN units where the SLDN units are subjected to direct sunlight. Excessive heating may create a fire hazard or damage the SLDN units.

Operating Instructions

Notes for Continuous Lighting (Integrated Mounting)

- Up to 10 SLD30N or SLD44N units can be lit continuously. Up to six SLD72N or SLD48N units can be lit continuously. When more units are mounted, consider the following restrictions.
- When more SLDN units are mounted, do not light more than 50% of the SLDN units continuously and light the units in a checkerboard pattern.
- When more than 50% of the units are lit continuously, limit the lighting duration to 40 minutes. Before lighting the units again, make sure that all units have cooled down.
- When using the SLDN units in other conditions, consult IDEC.
- When using 2-color alternate type units, do not light the two colors simultaneously.

Notes for Panel Mounting

- Tighten the mounting clips to a torque of 0.4 to 0.5 N·m.
- Do not repeat installation and removal of mounting clips many times. The mounting clips will become deformed and fail to ensure proper tightening.
- When mounting the SLDN units on a panel, determine the panel thickness taking the weights of the SLDN units and wires into consideration.

Wiring

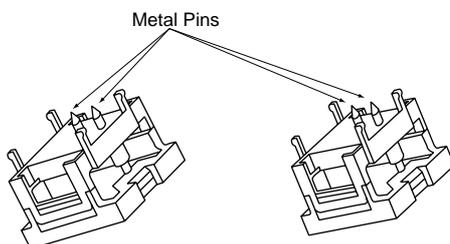

- Proper tightening torque of terminal screws are shown in the table below:

Terminal Screw	Proper Tightening Torque
M3	0.6 to 1.0 N·m
M3.5	1.0 to 1.3 N·m

- Use an insulation sheath or marking tube on the crimping part of crimping terminals to prevent electrical shocks.
- M3.5 terminals can be wired using one or two $\phi 1.6$ mm solid wires or 2 mm² stranded wires. M3 terminals can be wired using one or two 1.25 mm² stranded wires.

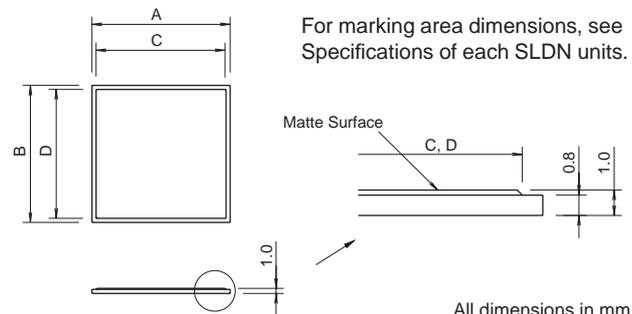

Caution for Electrostatic Discharge (ESD)

- When replacing blue and green LED units, avoid ESD to the LED pins, otherwise the internal LED elements may become damaged.

Marking

- Legends can be engraved on the clear marking plates and color screens, whose dimensions are shown below

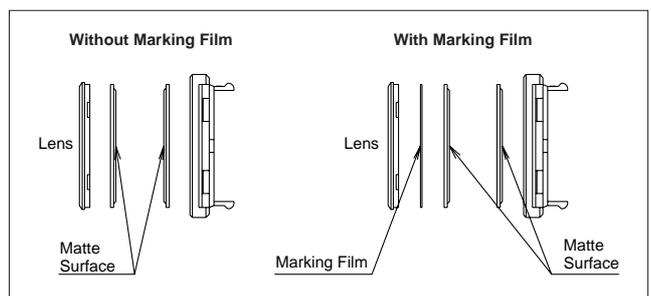

All dimensions in mm.

For use on	Face	Type No.	A	B	C	D
SLD30N	Full	SLDN-3C-□	27.0	27.0	25.4	25.4
SLD44N	Full	SLDN-44C-□	31.0	31.0	29.4	29.4
SLD72N	Full	SLDN-7C-□	63.0	27.0	61.4	25.4
	2-way split	SLDN-7C2-□	31.5	27.0	29.9	25.4
	3-way split	SLDN-7C3-□	21.0	27.0	19.4	25.4
SLD48N	Full	SLDN-8C-□	71.0	31.0	69.4	29.4
	2-way split	SLDN-8C2-□	35.5	31.0	33.9	29.4
	3-way split	SLDN-8C3-□	23.5	31.0	21.9	29.4

- In addition, thin marking films can be inserted as illustrated below. Two sheets of 0.1-mm-thick films or one sheet of 0.2-mm-thick film is applicable. Marking films are not supplied with the SLDN units and must be prepared by the user. Polyester films are recommended.

For use on	Marking Film Dimensions
SLD30N	27 × 27 mm
SLD44N	31 × 31 mm
SLD72N	27 × 63 mm
SLD48N	31 × 71 mm

- Placement of Marking Plate and Marking Film
When using a marking film, place the matte surfaces of the marking plate and color screen in the same direction to make a room for the marking film. If the matte surfaces face with each other, the marking film cannot be inserted.

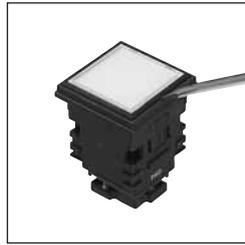

Operating Instructions

Illumination Units

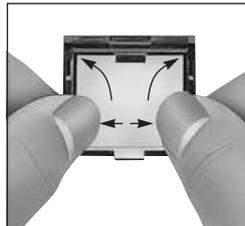

• Removing the Display Window

To remove the display window, insert the tip of a flat screwdriver into the slot on top or bottom of the lens frame. Lens unit removal tool MT-S01 can also be used to remove the display window.

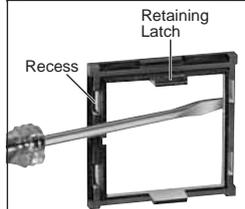

• Replacing the Lens, Marking Plate, and Color Screen [Removal]

The lens has two retaining projections each on right and left sides. To remove the lens, color screen, and marking plate from the lens frame, push open the lens frame with both hands as shown.

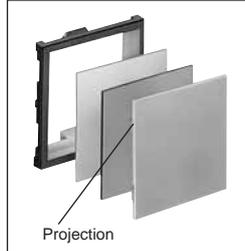

The lens can also be removed by inserting a screwdriver into one of the sides with recesses. Since the lens has an orientation due to projections, be sure to insert the screwdriver in the direction as shown. Take care not to damage or scratch the lens surface.

[Installation]

Install the color screen and marking plate into the lens frame.

To install the lens, insert its retaining projections into the recesses inside the lens frame, and press the lens on the other side into the lens frame.

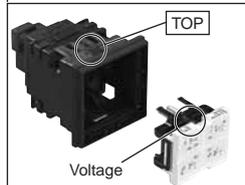

• Replacing the LED Unit [Removal]

Use the LED unit removal tool (MT-101) to pull out the LED unit.

[Installation]

The LED unit has an orientation. To install the LED unit, place the voltage marking on the LED unit in the same direction as the TOP marking on the on the LED unit, and push in the LED unit.

• Placement of Marking Plate and Color Screen

Insert marking plate, color screen, and marking film in the proper order as described below.

For use on	Placement
White Display (lamp off)	
Color Display (lamp off) Install a color screen and a white plate.	
Marking Film (prepared by the user)	

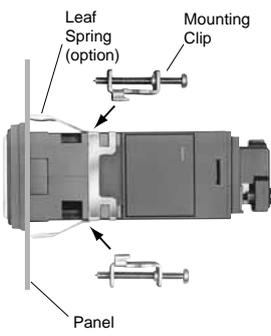

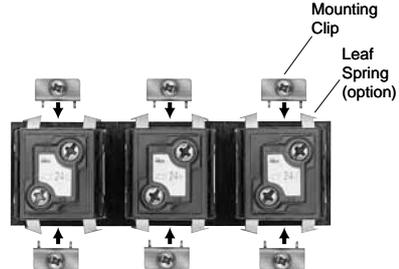

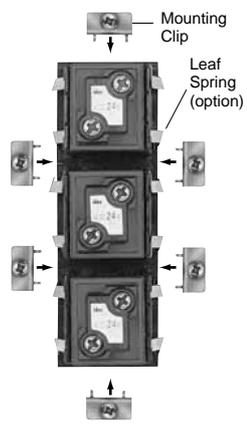

Operating Instructions

Installation on Panel: SLD30N & SLD44N (Square Types)

• Single, Horizontal, or Vertical One-row Mounting

All SLDN units are mounted using the supplied mounting clips. When using leaf springs for temporary fastening, order SLD30KVP (for SLD30N) or SLDN-44KVP (for SLD44N) separately.

A maximum of 20 SLD30N or SLD44N units can be mounted collectively in a row or integrated form.

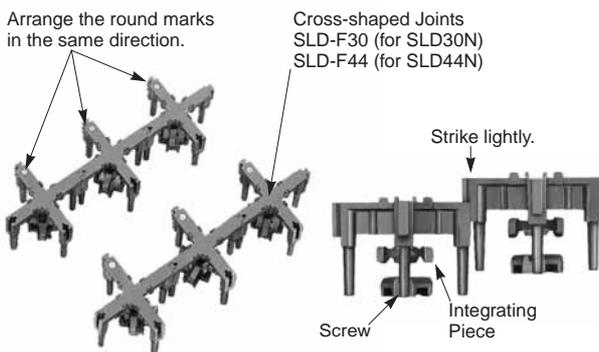

Mounting	Single Mounting	Horizontal Mounting	Vertical Mounting
Outside View			
Mounting Procedure	Push the SLDN unit into the panel cut-out from the front of the panel. When using optional leaf springs for temporary fastening, attach the leaf springs before installing the SLDN unit. Install two mounting clips and tighten the screws.	Push the SLDN units starting from the end of the row into the panel cut-out from the front of the panel. When using optional leaf springs for temporary fastening, attach the leaf springs before installing the SLDN unit. Install two mounting clips to each unit and tighten the screws.	Push the SLDN units starting from the bottom of the column into the panel cut-out from the front of the panel. When using optional leaf springs for temporary fastening, attach the leaf springs before installing the SLDN unit. Install mounting clips to combine adjoining SLDN units and one mounting clip each at the top and bottom of the column, and tighten the screws.

Note: Tighten the mounting clip screws to a torque of approx. 0.4 to 0.5 N·m.

• Integrated Mounting

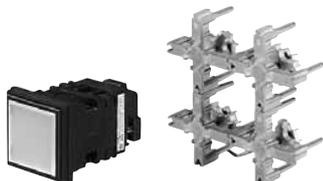

1. Assemble the cross-shaped joints.

First, assemble the cross-shaped joints in a row with round marks in the same direction. Then, combine the rows of assembled cross-shaped joints together.

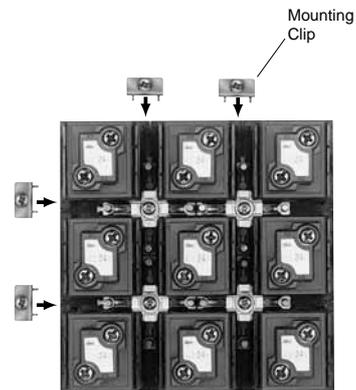

2. Lock the housings with the cross-shaped joints.

Insert the SLDN units into the assembled cross-shaped joints. Tighten the screws to integrate adjoining four SLDN units with the integrating pieces on the cross-shaped joints.

3. Install into panel cut-out.

Insert the cluster of SLDN units into the panel cut-out from the front of the panel. Install the mounting clips as shown and tighten the screws lightly to a torque of approximately 0.4 to 0.5 N·m.

Quantity of mounting clips = $(N - 1) \times 2 + (N' - 1) \times 2$

Quantity of cross-shaped joints = $(N - 1) \times (N' - 1)$

where N and N' are the numbers of rows and columns, respectively.

SLDN Series Display Lights

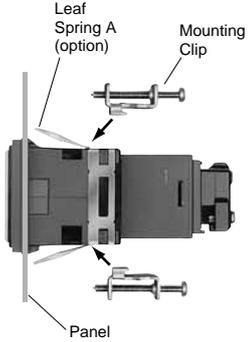

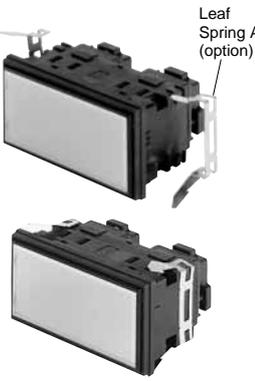

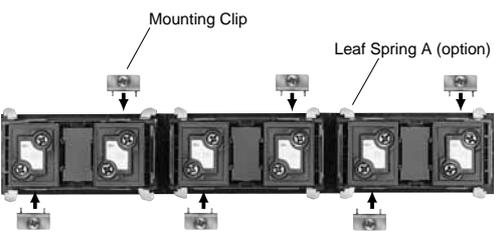

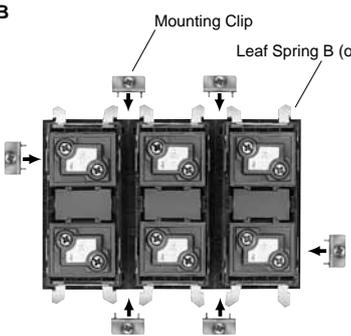

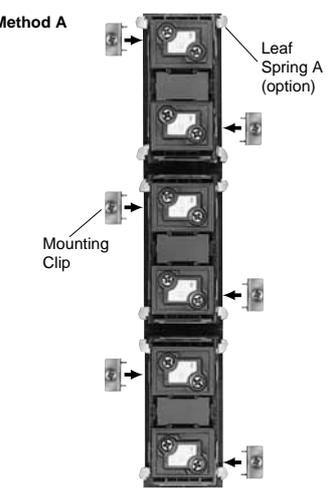

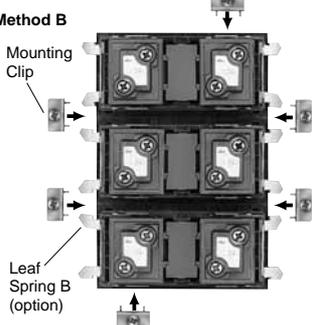

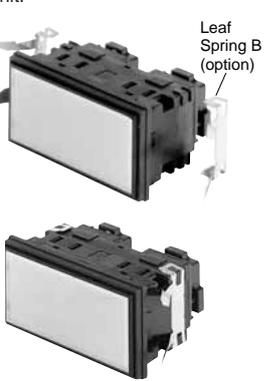

Operating Instructions

Installation on Panel: SLD72N & SLD48N (Rectangular Types)

• Single, Horizontal, or Vertical One-row Mounting

All SLDN units are mounted using the supplied mounting clips. When using leaf springs for temporary fastening, order SLD30KVP or SLD-7KVP (for SLD72N) or SLDN-44KVP or SLDN-8KVP (for SLD48N) separately.

A maximum of 10 SLD72N or SLD48N units can be mounted collectively in a row or integrated form.

Mounting	Single Mounting	Horizontal Mounting	Vertical Mounting
<p>Outside View</p> 	<p>Push the SLDN unit into the panel cut-out from the front of the panel. When using optional leaf springs for temporary fastening, attach the leaf springs before installing the SLDN unit.</p>  <p>Install two mounting clips and tighten the screws.</p>	<p>Method A</p>  <p>Method B</p>  <p>Push the SLDN units starting from the end of the row into the panel cut-out from the front of the panel. When using optional leaf springs for temporary fastening, attach the leaf springs before installing the SLDN unit.</p>  <p>Install mounting clips to combine adjoining SLDN units and one mounting clip each at the top and bottom of the column, and tighten the screws.</p>

Note 1: Tighten the mounting clip screws to a torque of approx. 0.4 to 0.5 N·m.

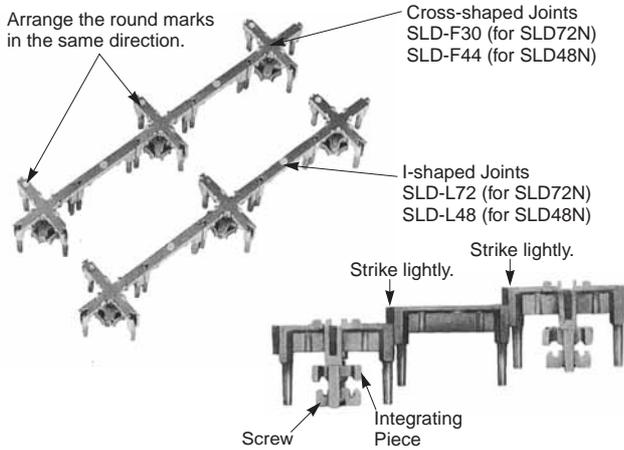

Note 2: Leaf spring A provides wings on the longer side of the SLDN unit. Leaf spring B provides wings on the shorter side of the SLDN unit. Leaf springs are not supplied with the SLDN unit. When leaf springs A are required, specify Type No. SLD-30KVP (for SLD72N) or SLDN-44KVP (for SLD48N) and required quantity in pairs. When leaf springs B are required, specify Type No. SLD-7KVP (for SLD72N) or SLDN-8KVP (for SLD48N) and required quantity in pairs.

Operating Instructions

• Integrated Mounting

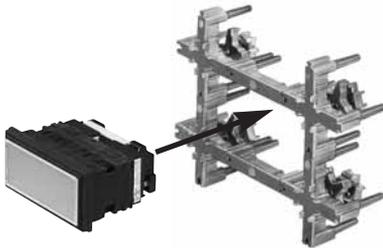

1. Assemble the cross-shaped joints.

First, assemble the cross-shaped joints in a row with round marks in the same direction together with the I-shaped joints. Then, combine the rows of assembled cross-shaped joints together.

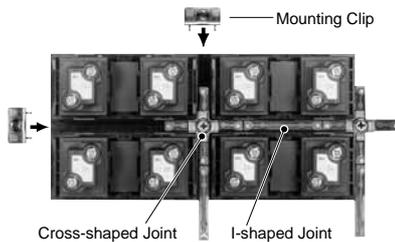

2. Lock the housings with the cross-shaped joints.

Insert the SLDN units into the assembled joints. Tighten the screws to integrate adjoining SLDN units with the integrating pieces on the cross-shaped joints.

3. Install into panel cut-out.

Insert the cluster of SLDN units into the panel cut-out from the front of the panel. Install the mounting clips as shown and tighten the screws lightly to a torque of approximately 0.4 to 0.5 N·m.

Quantity of mounting clips = $(N - 1) \times 2 + (N' - 1) \times 2$

Quantity of cross-shaped joints = $(N - 1) \times (N' - 1)$

Quantity of I-shaped joints

For horizontal mounting = $(N - 1) \times (N' - 2)$

For vertical mounting = $(N - 2) \times (N' - 1)$

where N and N' are the numbers of rows and columns, respectively.

• Quantities of Mounting Clips, Cross-shaped Joints, and I-shaped Joints Used for Integrated Mounting

Columns (N')	Mounting Clips and Joints	Rows (N)			
		2	3	4	5
2	Mounting Clips	4	6	8	10
	Cross-shaped Joints	1	2	3	4
	I-shaped Joints	0	1	2	3
3	Mounting Clips	6	8	10	12
	Cross-shaped Joints	2	4	6	8
	I-shaped Joints	0	2	4	6
4	Mounting Clips	8	10	12	14
	Cross-shaped Joints	3	6	9	12
	I-shaped Joints	0	3	6	9
5	Mounting Clips	10	12	14	—
	Cross-shaped Joints	4	8	12	—
	I-shaped Joints	0	4	8	—

Quantity of SLDN units = $N \times N'$

The maximum quantity of square SLD30N and SLD44N units for integrated mounting is 20.

The maximum quantity of rectangular SLD72N and SLD48N units for integrated mounting is 10 as shown with shading in the table above.

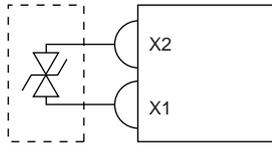

SLDN Series Display Lights

Operating Instructions

Notes for Using LED Units

• Precautions for Noise

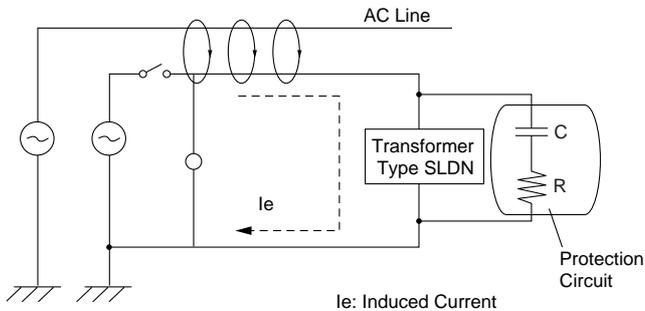

When using the SLDN unit in an environment where the SLDN is subjected to noise, connect a noise suppressor across terminals X1 and X2 as shown below.

• Countermeasures against Dim Lighting

The SLDN unit contains a provision against dim lighting due to leakage current. If the LED unit appears to be dimly lit due to induced current from nearby AC lines, take appropriate countermeasures as described below.

[Sample Circuit]

[Countermeasure]

As shown in the diagram above, connect an RC circuit in parallel with the transformer type SLDN unit. For the values of the resistor and capacitor, see the following table.

SLDN Rated Operating Voltage	Resistor R		Capacitor C (μF)
	(Ω)	(W)	
100/110V AC (50/60 Hz)	120	0.25	0.33
200/220V AC (50/60 Hz)	120	0.25	0.10

• Installation Location

Amber, white, and yellow LED units generate very weak infrared rays. When the environment is vulnerable to infrared rays, provide appropriate protection.

Ordering Information

Notes for Ordering

1. When ordering SLDN units and accessories, specify the Type No. and quantity.
2. All SLDN units except for 6V and 12V AC/DC types are supplied with LED unit(s). For 6V and 12V AC/DC type units, order LED units separately.
3. When ordering 2-way or 3-way split illumination type SLD72N and SLD48N units (24V AC/DC full voltage and transformer types) shown on pages 10 and 14, specify the Type No. including standard color codes.
4. All SLDN units are supplied with two mounting clips.
5. All SLDN units are not supplied with leaf springs. When using leaf springs for temporary fastening, order applicable leaf springs separately. See pages 23 and 24.
6. All SLDN units are supplied with a clear marking plate of the full illumination face size and white color screens of the specified split face size. When color display is required during power off for a full illumination face, order a color screen. When color display is required for a split illumination face, order color screens of the split face size and a white marking plate of the full illumination face size. See page 18.

Ordering Examples

• Single Mounting

[Ex. 1] 24V AC/DC Full Voltage Type Units
 SLDN Unit SLD30N-1DH2BR 10 pcs

[Ex. 2] 6V AC/DC Full Voltage Type Units
 SLDN Unit SLD30N-1DH0B-6 10 pcs
 LED Unit SLDN-36F-RT 5 pcs
 LED Unit SLDN-36F-GT 5 pcs

[Ex. 3] 24V AC/DC Full Voltage Type Units (2-way split)
 SLDN Unit SLD72N-2DH2BGR 10 pcs
 SLDN Unit SLD72N-2DH2BRW 10 pcs

[Ex. 4] 6V AC/DC Full Voltage Type Units (2-way split)
 SLDN Unit SLD72N-2DH0B-6 10 pcs
 LED Unit SLDN-96F-RT 10 pcs
 LED Unit SLDN-96F-GT 10 pcs

[Ex. 5] 24V AC/DC Full Voltage Type Units (3-way split)
 SLDN Unit SLD48N-3DH2BGAR 10 pcs

[Ex. 6] 115/120V AC Transformer Type Units (3-way split)
 SLDN Unit SLD48N-3TH12BGRW 10 pcs

[Ex. 7] 6V AC/DC Full Voltage Type Units (3-way split)
 SLDN Unit SLD48N-3DH0B-6 10 pcs
 LED Unit SLDN-76F-GT 10 pcs
 LED Unit SLDN-76F-AT 10 pcs
 LED Unit SLDN-76F-RT 10 pcs

• Integrated Mounting

[Ex. 8] Square Type Units (4 rows × 5 columns)
 SLDN Unit SLD30N-1DH2BR 20 pcs
 Cross-shaped Joint SLD-F30PN05 3 packs (15 pcs)

[Ex. 9] Rectangular Type Units (2 rows × 5 columns)
 SLDN Unit SLD48N-1DH2BR 10 pcs
 Cross-shaped Joint SLD-F44PN05 1 pack (5 pcs)
 I-shaped Joint SLD-L48PN05 1 pack (5 pcs)

• Color Display When Lamp Off

[Ex. 10] 1-color Full Illumination Units
 SLDN Unit SLD72N-1DH2BR 10 pcs
 Color Screen SLDN-7C-RPN05 2 packs (10 pcs)

[Ex. 11] 3-way Split Illumination Units
 SLDN Unit SLD72N-3DH2BGAR 10 pcs
 Marking Plate (white) SLDN-7C-FWPN05 2 packs (10 pcs)
 Color Screen SLDN-7C3-GPN05 2 packs (10 pcs)
 Color Screen SLDN-7C3-APN05 2 packs (10 pcs)
 Color Screen SLDN-7C3-RPN05 2 packs (10 pcs)
